Redux

Git

WORK EXPERIENCE

Software Developer Intern

Thomson Reuters

06/2020 - 08/2020

Achievements/Tasks

- Updated 8 modal components to enable popup windows to have the ability to maximize and resize for improved UI/UX
- Implemented unit tests for Angular TypeScript components, reducers, and selectors in Jasmine to ensure code quality
- Created a Page Title feature with NgRx (Redux) state management and ASP.NET Core for displaying on-premise environment configuration for development and test environments
- Improved tab component to have responsive SCSS styles to match the design specification by UI/UX designers

PROJECTS

Bug Tracker (<https://stevengarcia.netlify.app/project/1>)

- Implemented a RESTful API with ASP.NET Core and used Entity Framework Core for data persistence to SQL Server
- Developed React and Redux client with responsive CSS styles using CSS Grid, Flexbox, and Styled Components

Bucket List Social Network (<https://stevengarcia.netlify.app/project/3>)

- Used Redux-Thunk for asynchronous middleware calls to Node.js API to retrieve JSON data for bucket list, activity feed, and message pages
- Developed REST API in Node.js and Express to retrieve data persisted in MongoDB database
- Implemented user authentication and authorization with JSON web tokens and bcrypt library for hashing secure passwords
- Ensured responsive design by using Flexbox and media queries

Reddit Data Heatmap (<https://stevengarcia.netlify.app/project/2>)

- Created a heat map for users to visualize the data from the Reddit API and determine when is the best time to post on a subreddit
- Implemented integration tests in React Testing Library and Jest to ensure code quality
- Developed application using React and Styled Components

EDUCATION

B.S. Computer Science

Cal State University of Long Beach

08/2015 - 05/2020
